DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 4 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by McCary et al.

The reference shows apparatus for plating an immersed substrate surface with pits comprising a first bath different from a second bath. See Figure 2; col. 1, lines 34-40; col. 2, lines 20-54; and column 3, lines 16-40. The reference does not recite “fine pits”, however, because of the wire size recited in the reference, the pits would be considered inherently “fine”.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 2-6, 8-12, and 17-28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 17, lacks antecedent basis for the term "barrier layer". Claims 2-6, 8-21, 23-28 do not further limit the claims from which they depend or are a recitation of process limitations in apparatus claims. The solution in the baths and substrate are not considered a part of the apparatus structure.

Allowable Subject Matter

5. Claims 16 and 29-31 are allowed.
6. Claims 13-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Toledo, Fromson, Nakao, and Furuya show apparatus with multiple baths for treating substrates.
8. The following is a statement of reasons for the indication of allowable subject matter: The references of record do not suggest or show apparatus including a plating bath, a first plating solution supply, a second plating solution supply and a switch for switching the supply of the first plating solution from the first plating supply an said second plating solution from the second solution supply to the plating bath on and off.
